PREFACE

SINCE the writer completed, more than a quarter of a century ago, the first American "Who's Who" publication, the field for reference books of that class has largely expanded, in this country and elsewhere. After creating that original publication and editing its first four biennial editions, he carried the same idea into other and more specialized fields, and has had the creative part in the production of every American "Who's Who" book of more than ephemeral value.

Of these specialized publications no other has had so strong a personal appeal to the writer as has WHO'S WHO IN JURISPRUDENCE. For, before the accidences of time and circumstance shunted him off into journalism and literature, he was for two decades an active legal practitioner with civil and criminal cases in many courts. He has never lost interest in the Law and its votaries, and has long had the desire to produce the volume now presented for the approval of the profession.

The first requisite of a book of this kind is that the matter it contains shall be free from any taint of purchase. In all the thousands of biographies and millions of ems of type in the volume, there is not one line or word that has been, will be, or could have been paid for. Nor has the matter of subscription to the volume had anything to do with the inclusion of a single record out of the 12,600 in the book. That is a larger number of biographies than has ever before been gathered in a First Edition "Who's Who."

What is claimed for the volume is that it is a reference book, full of useful biographical facts and personal statistics, without fulsomness, puffery or adjectival exhuberance, concerning a representative array of lawyers and jurists in all parts of the United States, Canada and Newfoundland.

Selection of names has been based, as far as it has been possible to secure guidance, on the legal ability and professional standing of the individual lawyer in his own community, though, of course, the lawyers of national fame and the members of the higher judiciary have been special objects of attention.

Doubtless many names will be missed. Thousands who were asked for data failed to supply them; some whose records were written up and submitted for correction failed to return them. Others have furnished personal but not professional data, and some have merely furnished their names and addresses and were therefore not included. If any name is included which represents too low a standard of ability or achievement to merit inclusion, it must be due to error of judgment. We cannot claim infallibility, though we are not conscious that there is a single undesirable in the whole list.

With the aid of the Geographical Index it should be easy to find the records of the lawyers of any particular locality. If any special name is sought it can be promptly found, because the records are alphabetically arranged.

The volume is unique in plan and scope. No other book has ever been published that could serve as a national and international explanatory roster of meritorious lawyers and representative jurists. Law lists are numerous, singling out lawyers in various localities; but they are only lists. The Geographical Index to the present volume is as good a list as any, carefully selected and representative of practically every important American and Canadian locality. Besides being a list, however, it is a guide to exact information about every name listed.

Lawyers, clients of lawyers and all people and institutions seeking legitimate information about living lawyers, will find in this book facilities nowhere else recorded, and data nowhere else available. To the general libraries it will be a valuable accession to reference shelves.

The book represents three years of strenuous labor on the part of the editor and his efficient staff. It was hoped to complete the work in two years, but an illness of the writer covering several months, and other unforeseen events, caused the delay. A book of a thousand pages was promised, but one more than 50 per cent. larger is presented for the approval of the profession.

We have bound it like a law book, and trust that it will find an honored place on the bookshelves of Bench and Bar. Biennial revisions are contemplated; constructive criticisms and helpful suggestions will be welcomed.
